## Objective

To secure a challenging and rewarding position in software development, where I can apply my skills and knowledge to contribute effectively towards the growth of the organization while continuing to learn and develop professionally.

## Education

SRM-Valliammai Engineering College, Chennai - TamilNadu  
Bachelors in Computer science and engineering, CGPA - 7.74

July 2019 - May 2023

## Experience

Lentera Technologies Private Limited — September 2024 – Present - Flutter Developer

Responsibilities & Contributions:

- Developed and maintained cross-platform mobile applications using Flutter and Dart.
- Implemented REST API integrations to support real-time data flow and enhance app responsiveness.
- Integrated FCM (Firebase Cloud Messaging) for push notifications and real-time alerts.
- Collaborated with cross-functional teams including backend developers, UI/UX designers.
- Focused on performance optimization, error handling, and smooth UI transitions.

## Projects

### 1. Zymra – IoT-Based Solar Panel Management App

- Developed both Customer and Installer modules for monitoring and managing solar panel systems.
- Integrated Razorpay for secure in-app payments.
- Implemented real-time notifications and updates using Firebase Cloud Messaging (FCM).
- Connected mobile app with backend services using REST APIs.
- Technologies: Flutter, Dart, REST API, Firebase Cloud Messaging (FCM), Razorpay.

### 2. HDP - Henkel Digital Presenter

- Migrated the application from Xamarin to Flutter, rebuilding the UI with a modern and responsive design.
- Implemented new features and smooth animations to improve user experience and performance.
- Optimized screens for better usability across different devices.
- Technologies: Flutter, Dart, Animations, Provider.

### 3.MAI – AI Chatbot Application

- Developed the frontend UI for a chatbot that displays company information, answers user queries, and recommends relevant details dynamically.
- Implemented state management using BLoC and followed Clean Architecture principles for scalability and maintainability
- Built interactive chat flows for improved user engagement.
- Technologies: Flutter, Dart, BLoC, Clean Architecture

## Achievement

---

### 100 Days of Flutter – Learning Journey

- In the initial stage of learning Flutter, I faced challenges and struggled to stay consistent while using online resources.
- To build discipline and improve my skills, I started the 100 Days of Flutter Challenge.
- I posted my daily progress on LinkedIn, sharing UI designs, features, and learnings.
- Received feedback and suggestions from the Flutter community, which helped me improve my code quality and UI design.
- This journey helped me develop strong consistency, better problem-solving skills, and confidence in Flutter development.
- Through this process, I built a solid foundation in Flutter, Dart, and app UI development and became more eager to explore advanced Flutter concepts.

## Skills

---

Languages : Dart

Framework : Flutter(Provider, Bloc)

Others: Git, Firebase, Sqflite
